UB Campus Safety

Final Presentation (Demo 2)

Tamika Chen | Raynisha Cornelio | Javier Castellanos | Alex Peraza | Abner Mencia

PROBLEM

- Lack of a comprehensive and user-friendly Campus Safety App.
- Inadequate convenience and real-time information dissemination.
- Growing demand for a centralized crisis response platform.
- Insufficient real-time warnings and location-based help.

SOLUTION

- The proposed Campus Safety App for the University of Belize will be a comprehensive mobile application designed to meet the diverse safety needs of students, faculty, and staff.

Purpose

- To enhance the overall safety and security of the University of Belize community by providing a centralized, user-friendly platform for real-time information sharing and crisis management.

Goals

- Create a unified, integrated, and user-friendly campus safety application to address the many safety challenges faced by our community.

- Provide comprehensive crisis management tools, such as emergency contact information.

- Utilize GPS technology to provide accurate location information during emergencies, including swift and effective assistance from emergency responders.

- Ensure that the application is accessible to all members of the university community, including individuals with disabilities.
